Cloud

We can develop customized gateway applications based on your need.

Cloud computing offers many benefits to NonStop users. If you need to interface Amazon Web Service (AWS), Microsoft Azure or Splunk, TIC Software can help you build gateway solutions that seamlessly integrate your NonStop applications with these cloud offerings.

Amazon Web Service Quick Start POC Service.

Want to do something with Cloud computing, but don't know how to start? Let us help you with our Quick Start POC Service. We develop this service with our partner Canam to help users get familiar with AWS as quickly as possible.

- Get started with AWS
- Learn about relevant AWS Services
- Loading data to AWS Data Lake, Datawarehouse, Database
- Use AWS Analytic tools for querying, visualization and reporting

Replication to the Cloud

We partner with Gravic to develop Shadowbase extension for client's special gateway requirements. We help clients develop applications that integrate NonStop applications with new technologies, such as SOAP or REST Web services, Amazon or Microsoft Azure Cloud. Learn more about TAG
