

Nonstop Business Rules: From Code to Business Specs with TIC Navigator

In the Nonstop world, we've always taken pride in systems that run reliably for decades. The architecture is fault-tolerant, the performance is scalable, and the reliability is peerless

TIC Software Navigator

TIC Navigator is an AI-powered intelligence platform that unlocks the business value hidden inside HPE NonStop applications.

It automatically analyzes NonStop source code—COBOL, SCOBOL, TAL/pTAL, C/C++, and TACL—and transforms complex, decades-old systems into clear, searchable insights.
