Gateway

TIC's Gateway Products enables NonStop legacy applications to interoperate with other platforms and technologies such as Windows, .NET and Web services.

Products: LightWave | uLinga | IP Forwarder | SOG | Prizm | S3Utils™ | TelePath

LightWave REST Suite

LightWave products utilize REST APIs to facilitate the exchange of data between NonStop applications and applications running on disparate systems, including PCs and mobile devices.

Prizm Gateway™

Prizm Gateway™ makes it easy for users to enable, maintain, monitor, and secure all API connections throughout the entire enterprise.

DATA SHEET Prizm | Learn More

S3Utils™

Data Transfer for HPE NonStop and AWS Storage

Easily transfer data between your Native NonStop Applications and your Enterprise cloud AWS Simple Storage Server (S3)

Learn More | DATA SHEET S3Utils™

uLinga

It is a NonStop application that can publish NonStop events and data to Kafka clusters to be picked up by any consuming subscribers on any platforms.

Learn More | Read our blog

IP Forwarder

A high performance, low latency process to distribute NonStop data to Splunk and other tools via TCP/IP or UDP.

Learn More

Server Object Gateway (SOG)

No complex application program interfaces (API) to learn, just standard ActiveX Control. SOG handles communication and automatic data conversion.
