Modernize

TIC provides modernization solutions, ranging from replacing Green Screen interface with GUI, to completely transforming COBOL and SCOBOL code into.NET and Java applications.

Products: LightWave | XML Thunder | uLinga | JSON Thunder | IP Forwarder | TOP

LightWave REST Suite

LightWave products utilize REST APIs to facilitate the exchange of data between NonStop applications and applications running on disparate systems, including PCs and mobile devices.

IP Forwarder

A high performance, low latency process to distribute NonStop data to Splunk and other tools via TCP/IP or UDP.

Learn More

TOP

TOP provides a graphical user interface (GUI) to HPE NonStop servers through a Windows program. New staff can now become productive on the NonStop in no time using a GUI tool, instead of struggling through a command interface like TACL.
